**Notes Inc. Opens Nevada Factory**

**Syracuse, New York, January 5, 2009** -- Notes Inc. announced today that it is expanding operations by opening a second manufacturing plant in Sparks, Nevada, to produce its Stik-Withit® and Note Cube® brand line of notepads for West Coast distributor orders. Notes Inc. currently operates a state-of-the-art printing, coating and converting facility in Syracuse, New York.

Notes Inc. General Manager Pete Langdon said, "The new plant will allow us to more effectively service our distributors in the western half of the U.S. with significantly improved transit times and reduced freight costs."

The strategically located Nevada facility will allow for two-day ground transit to most western states for the company's best-selling products. The rest of the country will continue to be serviced by the upstate New York facility.

The company has also announced plans to further extend its customer service hours to be more responsive to regional needs. "These changes will enable us to provide the same quick response capability our customers expect from us, and position us to aggressively pursue growth opportunities in the region," Langdon said.

"In addition," he added, "We have revamped our website, ([www.notesincusa.com](http://www.notesincusa.com)), with 24-hour online ordering capabilities and fast-turnaround production. It's all part of a comprehensive plan to make Notes Inc. more accessible to our distributors."

*Notes Inc. is a market-leading promotional products supplier of custom-printed Stik-Withit® adhesive notepads and Note Cube® brand edge-printed notepads. The company is based in Syracuse, New York, where it operates a state-of-the-art manufacturing facility; has satellite offices in Dallas, Texas, and Long Island, New York; a satellite manufacturing plant in Sparks, Nevada, and has representation throughout the U.S. marketplace.*
